SUMMARY

Backend-focused Java Developer with 2+ years of experience in building scalable microservices using Spring Boot. Experienced in designing high-performance REST APIs, implementing secure authentication systems, and optimizing applications using Redis and Kafka. Proven track record of improving system performance, leading development teams, and handling production deployments in real-world environments.

SKILLS

Languages: Java, OOPs, Data Structures	DevOps: Docker, Jenkins, AWS, GitLab CI/CD, Nginx
Backend: Spring Boot, Microservices, REST APIs, Hibernate, JPA	Architecture: Distributed Systems, Event-Driven Architecture, System Design
Security: Spring Security, JWT, RBAC	Tools: Git, Postman, Linux
Messaging: Kafka, RabbitMQ	AI/ML: LLM Integration, Chatbots, Voice AI
Databases: PostgreSQL, Redis	

PROFESSIONAL EXPERIENCE

Scriza Pvt Ltd – Noida, India May 2023 – Present

Backend Developer Apr 2024 – Present

- Promoted from Associate Software Developer within 7 months based on performance and ownership
- Designed and developed 200+ scalable REST APIs using Spring Boot for authentication, user management, and business workflows
- Implemented JWT-based authentication and role-based access control securing APIs for multi-role systems
- Integrated AI-based chatbot using LLM, reducing customer support workload by 80%
- Automated CI/CD pipelines using GitLab, Docker, and Jenkins, reducing deployment time by 40%
- Managed production servers, handled critical debugging, and resolved live issues with minimal downtime
- Led a team of 4–6 developers, managing task allocation, sprint planning, and delivery timelines

Associate Software Developer Sep 2023 – Mar 2024

- Developed REST APIs using Spring Boot following clean architecture and best coding practices
- Designed and optimized database schemas, improving query performance and data handling efficiency
- Tested APIs using Postman and debugged issues to ensure stable releases
- Assisted in deployment, server configuration, and environment setup
- Participated in code reviews and contributed to maintaining high code quality standards

PROJECTS

Treat24 – Food Ordering & Restaurant Management Platform

- Developed and maintained backend services for a scalable food ordering and restaurant management platform using Java Spring Boot and microservices architecture.
- Implemented cart, menu, toppings, order, and restaurant management APIs with secure role-based authentication and authorization.
- Integrated Google Maps API for location-based services, address management, and improved delivery experience.
- Optimized API performance using Redis caching and efficient database query handling with PostgreSQL/MySQL.
- Worked on real-time order flow enhancements, bug fixing, Razorpay payment gateway integration in Super Admin and Restaurant panels, and production issue resolution.
- Managed deployment and server configurations using Docker, Nginx, PM2, and Linux-based cloud servers.
- Collaborated with frontend and cross-functional teams for feature integration, testing, and production deployments.

AI School ERP

- Designed and developed a complete AI-driven School ERP system using microservices architecture.
- Covered modules like Student, Library, HRMS, Transport, Accounts, Inventory, and Exams.
- Implemented role-based authentication and secure APIs.
- Integrated LLM-based chatbot for natural language interaction.
- Used Redis caching, WebSockets, and PostgreSQL for performance optimization.
- Deployed using Docker, Nginx, and CI/CD pipelines.

Rental Application

- Developed a rental platform where users can upload items for rent and other users can browse and request items.
- Designed and implemented REST APIs for item listing, user management, and booking workflows.
- Built using monolithic architecture with Spring Boot and PostgreSQL for data persistence.
- Implemented CRUD operations, search functionality, and user-based item management.
- Designed database schema for handling users, products, and rental transactions efficiently.
- Ensured data consistency and optimized queries for better performance.

ACHIEVEMENTS

- Awarded **Employee of the Year** at Scriza Pvt Ltd for successfully delivering AI-driven systems (School ERP and Calling Service), improving system performance, and ensuring production stability
- Promoted from Associate Software Developer to Backend Developer within 7 months for consistently delivering scalable backend solutions and taking ownership of critical modules
- Reduced customer support workload by **80%** by designing and integrating LLM-based chatbot and AI calling system for real-time user interaction
- Improved API response time by **30%** by implementing Redis caching and optimizing database queries in microservices architecture
- Reduced deployment time by **40%** by automating CI/CD pipelines using GitLab, Docker, and Jenkins, improving release efficiency across projects

EDUCATION

Masters in Computer Applications JB Knowledge Park, Faridabad	Sept 2023 – Present
Bachelors in Computer Applications JB Knowledge Park, Faridabad	Aug 2019 – Apr 2022

CERTIFICATES

Oracle AI & Machine Learning Certification Issued by Oracle University	Oct/2025
Certificate for the Completion of Java Developer Offered by Anudip Foundation, Mumbai	Oct/2022
